

TECHNICAL INFORMATION SHEET

SILVER RINSE

Code No. 14002

These pictograms form part of the BICS Certified Premiere Training System. Full details are available on request.

INTRODUCTION

The Premiere range of high quality catering products has been formulated for the routine maintenance, periodic deep cleaning and hygiene control in catering establishments.

The use of the appropriate kitchen cleaning product and equipment will clean, degrease and decarbonise, enhancing the appearance and considerably improving standards of hygiene.

First class results can only be achieved using the correct products, machines and equipment within the framework of a regular cleaning programme. This range makes it possible to select a kitchen cleaning product with precisely the right characteristics for the task and equipment available.

In case of difficulty in making the correct choice or for further information on Premiere's cleaning systems and extensive range of cleaning and maintenance chemicals, equipment and machines, contact the local Premiere Representative or Head Office in Cheltenham.

SILVER RINSE

A simple and effective dip immersion rinsing product to remove all traces of tarnish, brightening silver and silver plated cutlery and tableware.

For larger items, where dip immersion is not suitable, **Silver Rinse** may be directly applied. Items cleaned with **Silver Rinse** must be thoroughly rinsed with cold water. The use of hot water may cause yellowing.

The pH of **Silver Rinse** under typical analysis is 1.5.

DIRECTIONS

Always wear appropriate protective clothing and read product label and Safety Data Sheet before use.

1. CLEANING TECHNIQUES BY HAND

1.1 Cleaning Silver: Pour neat **Silver Rinse** into a plastic or glass bowl and immerse the articles for a few seconds, remove and rinse thoroughly with cold water. Wipe dry and polish with a soft clean cloth.

For larger articles dip a clean cloth or pad in neat **Silver Rinse** and wipe one section at a time until the tarnish is cleaned off. Rinse the treated section with cold water to remove the product before treating the next section. Wipe dry and polish with a soft clean cloth.

TRAINING AND ADVISORY CENTRE

The Technical Staff in the Training and Advisory Centre can ensure that the correct equipment and methods are used and our consultants can provide on-site training and advice. Standard Two Day Training Courses are held regularly in Cheltenham, and tailor-made courses can be arranged if necessary.

HEALTH AND SAFETY INFORMATION

Appropriate Health and Safety Information is detailed on the individual product label or relevant Health and Safety Data Sheet.

Urgent professional advice regarding First Aid may be obtained by contacting the nearest regional centre of the National Poisons Information / Service (NPIS), where all products are registered.

PACKAGING

1 x 5 Litre Polythene Containers **Premiere Code No. 14002**

No liability is accepted for any loss or damage arising directly or indirectly from the use of the Company's products, or from the use of the implied of freedom from patent rights. Prospective users should, therefore, satisfy themselves by appropriate trials that the product to be used is suitable for the intended use and that such will not infringe any patent.

We continue to reserve the right to alter designs of any product as part of a further process of improvement and products supplied may therefore vary from those detailed on this Technical Information Sheet.

QUALITY APPROVALS

BS EN ISO 9002

All products manufactured to Premiere formulations are processed conforming to appropriate standards within the Quality System described in the Quality Manual and comply with the requirements of ISO 9002.

Cert No.
947290
