

# TECHNICAL INFORMATION SHEET

## MACHINE DISHWASHING POWDER

Code No. 38013

These pictogrammes form part of the BICS Certified Premiere Training System. Full details are available on request.

### INTRODUCTION

The Premiere comprehensive range which has been specifically formulated to cater for all dishwashing requirements and water types and hardness encountered throughout the UK and Europe.

First class results can only be achieved using the correct equipment and products within the framework of a regular cleaning programme. The range of products enables the user to select those with precisely the right characteristics for the task.

In the case of difficulty in making the correct choice or for further information on Premiere's cleaning systems and extensive range of cleaning and maintenance chemicals, equipment and machines, contact the local Premiere Representative or the Head Office in Cheltenham.

### MACHINE DISHWASHING POWDER

A high quality concentrated low foaming detergent powder suitable for use in all domestic type dishwashing machines using hard or soft water. **Machine Dishwashing Powder** contains a water conditioner and works well in the hardest water. It is free flowing and easy to pour with high alkalinity to clean better and contains chlorine for maximum hygiene. **Machine Dishwashing Powder** also dissolves easily in water.

The pH of the concentrate under typical analysis is 12.5.

### DIRECTIONS

Always wear the appropriate protective clothing and read product label and Safety Data Sheet before use.

#### 1. FOR USE IN DISHWASHING MACHINES

Pour recommended amount of **Machine Dishwashing Powder** into machine compartment. The powder will feed as appropriate into the machine in use.

### RECOMMENDED MIX

RECOMMENDED MIX PER 4½ LITRES (PER GALLON)		
	SOFT WATER	HARD WATER
Small Domestic Machines	28 grammes (1oz)	43 grammes (1½ oz)
Large Domestic Machines	43 grammes (1½ oz)	57 grammes (2 oz)

In general, if items are coming out of the machine too hot to handle and dry rapidly to a clean, smear free finish, the machine is operating correctly.

### TRAINING AND ADVISORY CENTRE

The technical staff in the Training and Advisory Department can ensure that the correct equipment and methods are used and our Consultants can provide on-site training and advice. Standard Two Day Training Courses are held regularly in Cheltenham, and tailor made courses can be arranged if necessary.

### HEALTH AND SAFETY INFORMATION

Appropriate Health and Safety information is detailed on the individual product label or relevant Health and Safety Data Sheet.

Urgent professional advice regarding First Aid may be obtained by contacting the nearest regional centre of the National Poisons Information Service (NPIS), where all products are registered.

### PACKAGING

2 x 5 litre Polythene Containers

Premiere Code No. 08051

No liability is accepted for any loss or damage arising directly or indirectly from the use of the Company's products, or from the use of the information given in its publications; neither is any warrant given or implied of freedom from patent rights. Prospective users should, therefore, satisfy themselves by appropriate trials that the product to be used is suitable for the intended use and that such use will not infringe any patent.

We continue to reserve the right to alter designs of any products as part of a further process of improvement and products supplied may therefore vary from those detailed on this Technical Information Sheet.

### QUALITY APPROVALS

**BS EN ISO 9002**

All products manufactured to Premiere formulations are processed conforming to appropriate standards within the Quality System described in the Quality Manual and comply with the requirements of ISO 9002.

Cert No. 947290
